

Testing the ANDROMEDA method for exoplanet detection on VLT/NACO data

A. Eggenberger, A. Cornia, L. M. Mugnier, D. Mouillet,
G. Chauvin, A. Boccaletti, G. Rousset

ANDROMEDA: Novel method for the detection of exoplanets by SDI and/or ADI
(Mugnier et al. 2009; SPHERE project)

The poster:

- Application to ADI NACO data from The NACO-LP Collaboration ([poster 2.11](#))
- Optimization of the detection performance

Conclusions:

- Good detection performance for test-case targets
- Promising method for the analysis of data sets from next-generation instruments
